IN THE UNITED STATES PATENT & TRADEMARK OFFICE

Applicant: Evangelia G. Kranias et al : Paper No.:
5 Serial No.: 10/691,412 : Group Art Unit: 1645
Filing Date: October 22, 2003 : Examiner:
For: **Phospholamban Polymorphism and Methods of Assessment**

RESPONSE TO RESTRICTION REQUIREMENT

10

Mail Stop Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

15

Dear Sir:

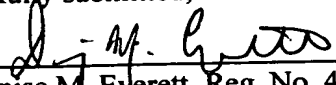

20 The Office Action dated October 6, 2005, In the Official Action dated October 6,
2005, the Examiner required restriction under 35 U.S.C. §121 between claims 1-14 and
16-17, drawn to methods for detecting a phospholamban polymorphism, and claim 15,
drawn to a phospholamban nucleic acid sequence. Applicant hereby elects claim 15 for
prosecution on the merits. This election is made with traverse on the basis that it would
not be unduly burdensome for the Examiner to examine all of claims 1-17 in the present
25 application, particularly since the independent method claims all require comparisons and
analysis with respect to a nucleotide fragment with a predetermined phospholamban
nucleotide fragment sequence, thereby necessitating overlap in the searching conducted
by the Examiner, regardless of classification scheme-based searching set forth by the
Examiner as indicative of necessarily independent search protocols.

30

Accordingly, reconsideration of the restriction requirement and examination of
claims 1-17 in the present application is respectfully requested.

Respectfully submitted,

By:
